SMFS

(social media for school, also fro business and organizations)

20223/08/03

author:-Kiran Raj Dhakal

nickname:-leyuskc

Description:-

SMFS is a social media for the organizations/business/schools. It is like a modular social media. You buy the source from us and make a costume setup in your own server and serve it to the students. It allows your organization to serve a costume social media interface for your members/students. As it will be on it own bubble no outside distractions affects the students. It allows the students to communicate and share their projects within their classmates or college mates. And if it is organization or business then their colleagues.

And if you cant not server your own version then you will be using our public version with less price.

Architecture:-

Features:-

- Explore pages; where they explore/find people with same hobby and skills
- Post:- Ability to post any form of content with skill and hobby as hashtags
- Timeline:- You will see the content according to your hobby and skills tags on the hierarchy of class/business→school/organizations→region→country.
